Frank Golatowski  
UNIVERSITY OF ROSTOCK

Jan Keiser  
UNIVERSITY OF TECHNOLOGY IN BERLIN

Florian Klompaker  
UNIVERSITY OF PADERBORN

The ITEA2 Board is enthusiastic about the excellent innovations achieved in the **LOMS** project. The project consortium managed to overcome the existing barriers between network operators, service operators and (local) service providers to simplify the creation of a wide set of new services for mobile users. The LOMS platform and the open-source tools, together with the new intermediate roles, provide the opportunity for a large group of local service providers to generate dedicated services easily for their local mobile customers, as was shown by several impressive real-life demonstrators.
